A phenomenology of landscape—places, paths, and—

Tilley is credited with introducing phenomenology into archaeology with his 1994 work A Phenomenology of Landscape. Phenomenology in archaeology entails the 'intuitive' study of material things, especially landscapes, in terms of their meanings to people in the past, and has been influential in both Britain and the United States.

Christopher Tilley— Wikipedia

This collection of essays explores the history, implications, and usefulness of phenomenology for the study of real and virtual places. While the influence of phenomenology on architecture and urban design has been widely acknowledged, its effect on the design of virtual places and environments has yet to be exposed to critical reflection.
