Information and communication technologies (ICTs) are increasingly being recognized as essential tools of development--tools that can empower poor people, enhance skills, increase productivity and improve governance at all levels. The success of ICT-enabled development (or e-development) will thus not be measured by the diffusion of technology, but by advances in development itself: economic growth and, ultimately, achievement of the Millenium Development Goals. This volume examines a wide range of issues related to e-development, with a focus on the requirements and realities of using ICTs to advance development goals. The report does not attempt to present a comprehensive overview of e-development. Rather, it highlights key issues that have immediate relevance to policy makers in developing nations who make decisions on investments and development goals. It highlights two issues in particular, e-government and e-education, because ICT applications in these areas can lead to significant development outcomes and can also be successfully deployed through public-private partnerships, leveraging limited government funding to achieve greater impact.

This book gathers the outcomes of the thirteenth Workshop on the Algorithmic Foundations of Robotics (WAFR), the premier event for showcasing cutting-edge research on algorithmic robotics. The latest WAFR, held at Universidad Polit\u00e9cnica de Yucat\u00e1n in M\u00e9rida, M\u00e9xico on December 9–11, 2018, continued this tradition. This book contains fifty-four papers presented at WAFR, which highlight the latest research on fundamental algorithmic robotics (e.g., planning, learning, navigation, control, manipulation, optimality, completeness, and complexity) demonstrated through several applications involving multi-robot systems, perception, and contact manipulation. Addressing a diverse range of topics in papers prepared by expert contributors, the book reflects the state of the art and outlines future directions in the field of algorithmic robotics.

What happens when a common guy next door encounters an accidental failure? He was determined to prove himself. Love enticed his heart. Destiny re-directs him to his dream career. A broken heart, a shattered dream, and a dejected soul culminated in a journey of retaliation and resolve. How did he sail through the curves of his life? Join him on this journey of dreams and love, debacle and hope, setback and comebacks, unlearn and learn; and the days of horror and survival in the midst of the world trade center attack. Life is the biggest teacher and the experiences are the real lessons. "Life never gives up on those who never give up on life"

Activity Analysis, Creativity and Playfulness in Pediatric Occupational Therapy: Making Play Just Right is a unique resource on pediatric activity and therapy analysis for occupational therapists and students. This text provides useful information on planning creative and playful activities within therapy sessions.

The biennial Digital Review of Asia Pacific is a comprehensive guide to the state-of-practice and trends in information and communication technologies for development (ICTD) in the Asia Pacific region. This fourth edition (2009-2010) features 30 economies and four sub-regional groupings. The chapters provide updated information on ICT infrastructure, industries, content and services, key programs, enabling policies and regulation, education and capacity building, open source, and research and development initiatives, as well as ICTD challenges in each of the economies covered. The common framework that underpins these reports allows readers to undertake a comparative analysis and assess progress across Asia Pacific. In addition, regional overviews provide a synthesis of ICTD trends, regulatory issues, and lessons for managing innovation in the network economy. The thematic chapters focus on issues in ICT in education, a key area in ICTD. The authors are drawn from government, academe, industry and civil society, providing a broad perspective on the use of ICTs for human development.

The biennial Digital Review of Asia Pacific is a comprehensive guide to the state-of-practice and trends in ICT for development (ICT4D) in Asia Pacific, carrying 31 updated country reports on the theme of ICT and education.
