For example: $4y + 7x - 5y + 3x$. The $5y$ carries the negative operator with it. When we combine this, we will end up with $-1y + 10x$. I like to urge students to underline like terms. If you have two like terms that involve the variable x and y , I would have them underline the x terms once. This would be followed by underlining the y terms twice.

"Prealgebra is designed to meet scope and sequence requirements for a one-semester prealgebra course. The text introduces the fundamental concepts of algebra while addressing the needs of students with diverse backgrounds and learning styles. Each topic builds upon previously developed material to demonstrate the cohesiveness and structure of mathematics. Prealgebra follows a nontraditional approach in its presentation of content. The beginning, in particular, is presented as a sequence of small steps so that students gain confidence in their ability to succeed in the course. The order of topics was carefully planned to emphasize the logical progression throughout the course and to facilitate a thorough understanding of each concept. As new ideas are presented, they are explicitly related to previous topics."--BC Campus website.

Standards-Driven Power Algebra I is a textbook and classroom supplement for students, parents, teachers and administrators who need to perform in a standards-based environment. This book is from the official Standards-Driven Series (Standards-Driven and Power Algebra I are trademarks of Nathaniel Max Rock). The book features 412 pages of hands-on standards-driven study guide material on how to understand and retain Algebra I. Standards-Driven means that the book takes a standard-by-standard approach to curriculum. Each of the 25 Algebra I standards are covered one-at-a-time. Full explanations with step-by-step instructions are provided. Worksheets for each standard are provided with explanations. 25-question multiple choice quizzes are provided for each standard. Seven, full-length, 100 problem comprehensive final exams are included with answer keys. Newly revised and classroom tested. Author Nathaniel Max Rock is an engineer by training with a Masters Degree in business. He brings years of life-learning and math-learning experiences to this work which is used as a supplemental text in his high school Algebra I classes. If you are struggling in a "standards-based" Algebra I class, then you need this book! (E-Book ISBN#0-9749392-1-8 (ISBN13#978-0-9749392-1-6))

Rock takes readers through the standards, one-by-one, to learn what is required to master Algebra I. (Education/Teaching)

In this adventure, Ella and her classmates are seeking treasures! However, to discover how many steps they must take to reach the treasure, they will have to isolate the variable to discover where "X" marks the spot. They are given a 2-step equation as a clue. Ella teaches them along the way, and together they discover that the greatest treasure is knowledge. Students learn about the distributive, associative, and commutative properties; combining like terms, and solving equations. Worksheets with examples are included to help reinforce the concepts.

Not everyone has a knack for Mathematics and several people simply give up when the teacher begins adding letters into the equations. However, there are actually some solid uses for Algebra 2 other than keeping headache medicine manufacturers in business. Building on the ideas and core concepts learned in basic Algebra, the intermediate Algebra 2 introduces abstract thinking. Students learn how to identify likenesses and evaluate equations based on their characteristics. This information is useful for higher mathematical pursuits and is also helpful for general life. The analytic approach to problem solving is essential in both employment situations and personal relationships.

Color & Solve will relax the mind as Carl Jung said but also to ease the anxiety of the day to day hustle. It is not the typical coloring book. The imagination spilled out of a relaxed mind to awaken a fertile imagination. Original artwork and word searches relieve stress, erase boredom, and sweep us off to a place that does not require much effort-- just mindless fun. Color & Solve is sure to activate small muscle motor skills while elevating a person's mood and focusing on positive & serene vibes the colors coax out in us all.

This edited book is about preparing pre-service and in-service teachers to teach secondary-level mathematics to English Language Learners (ELLs) in twenty-first century classrooms. Chapter topics are grounded in both research and practice, addressing a range of timely topics including the current state of ELL education in the secondary mathematics classroom, approaches to leveraging the talents and strengths of bilingual students in heterogeneous classrooms, best practices in teaching mathematics to multilingual students, and ways to infuse the secondary mathematics teacher preparation curriculum
