Computational Science and Engineering by Strang, Gilbert ...
Computational Science and Engineering CSE is a multidisciplinary application-driven field that deals with the development and application of computational models and simulations. Intricate (e.g. multiscale) problems arising in engineering analysis and the study of natural phenomena can often only be simulated using high performance computing facilities.

Computational Science and Engineering - TU Delft
Computational Science and Engineering (CSE) is the multi-disciplinary field of computer-based modelling and simulation for studying scientific phenomena and engineering designs. Modelling and simulation helps to validate theory, and makes it possible to analyse scenarios that would otherwise be too time-consuming, expensive, or dangerous to study by experiment.
