Real examples. Real companies. Real business decisions. Covering the core economics principles and providing engaging, relevant examples within just nineteen Chapters, Hubbard Essentials of Economics is the perfect teaching and learning resource for a one semester unit. The authors present economics as a dynamic, relevant discipline for Australasian students. The key questions students of first year economics ask themselves are: ‘Why am I here?’ and ‘Will I ever use this?’ Hubbard Essentials of Economics answers these questions by demonstrating that real businesses use economics to make real decisions every day. Each chapter of the text opens with a case study featuring a real business or real business situation, refers to the study throughout the Chapter, and concludes with An Inside Look—a news article format which illustrates how a key principle covered in the Chapter relates to real business situations or was used by a real company to make a real business decision.

industry of sport marketing. A full-color presentation brings this vibrant field to life with comprehensive coverage—balanced between theoretical and practical—to provide an understanding of the foundations of sport marketing and how to enhance the sport experience. Building on the legacy that Bernard Mullin, Stephen Hardy, and William Sutton established in the first four editions, a new author team, handpicked by their predecessors, draw from their modern experience in the field to add a fresh perspective to this essential text. They bring the sport industry directly to the reader through extensive industry examples, interviews of top sports executives, challenging case studies, and global perspectives from teams, leagues, and other agencies around the world. Reflecting the evolving landscape of sport marketing, the text will prepare students to stay on the leading edge with the following updates: A focus on current and emerging technologies and how they have revolutionized the sport industry—ranging from mobile video streaming and fantasy sports to artificial intelligence and virtual reality Greater emphasis on data and analytics to make more informed business decisions In-depth examination of how social media and digital platforms serve as critical communication channels to drive sport marketing strategy and execution New content on target marketing, including understanding millennial sports fans and engaging with Generation Z Updated coverage of sales processes, addressing both traditional methods and new strategies for the mobile age Discussion of modern ticketing practices and the secondary ticket market, including how leagues partner with secondary ticket providers and the impact on pricing strategies Also new to the fifth edition are related online learning aids, now delivered through HKPropel, designed to engage students and test comprehension of the material. Exclusive video interviews with sport industry leaders offer insights into how they incorporate marketing strategies into their daily work. Discussion questions and activities for each chapter guide students to apply core concepts, and web search activities provide opportunities for students to compare strategies found on

“ Eureka! Skousen has done the impossible. Students love it! I will never use another textbook again. ” —Harry Veryser, University of Detroit-Mercy They said it couldn ’ t be done. Austrian economics is so different, they said, that it couldn ’ t be integrated into standard “ neo-classical ” textbooks. Consequently, college students learn nothing about the great Austrian economists (Mises, Hayek, Schumpeter). Professor Mark Skousen ’ s Economic Logic aims to change that. Based on his popular course taught at Columbia University, Skousen starts his “ micro ” section with Carl Menger ’ s “ theory of the good ” and the profit-and-loss income statement to explain the dynamics of the market process, entrepreneurship, and the advantages of saving. Then he uses a powerful Hayekian four-stage model of the economy to introduce “ macro, ” including a new Austrian measure of spending at all stages of production (Gross Domestic Expenditures). Economic Logic also offers chapters on: The international gold standard, the defects of central banking, and the Mises/Hayek theory of the business cycle. A full critique of the Keynesian Aggregate Supply and Demand (AS-AD) model, and a revolutionary Austrian alternative. Entrepreneurship, the financial markets, environmental economics, monetary policy and inflation, federal spending and taxes, and government regulation. Leaders of all

Financial Management in the Sport Industry provides readers with an understanding of sport finance and the importance of sound financial management in the sport industry. It begins by covering finance basics and the tools and techniques of financial quantification, using current industry examples to apply the principles of financial management to sport. It then goes beyond the basics to show how financial management works specifically in sport - how decisions are made to ensure wealth maximization. Discussions include debt and equity financing, capital budgeting, facility financing, economic impact, risk and return, time value of money, and more. The final section focuses on sport finance in three sectors of the industry - public sector sports, collegiate athletics, and professional sport-providing in-depth analysis of financial management in each sector. Sidebars, case studies, concept checks, and practice problems throughout provide practical applications of the material and enable thorough study and practice. The business of sport has changed dynamically since the publication of the first edition, and this second edition reflects the impact of these changes on financial management in the sport industry. New to this edition are changes to reflect the global nature of sport (with, for example, discussions of income tax rates in the Premiere League), expanded material on the use of spreadsheets for financial calculations, a primer on accounting principles to help students interpret financial statements, a valuation case study assignment that takes students step by step through a valuation, a new stadium feasibility analysis using the efforts of the Oakland Raiders to obtain a new stadium, a new economic impact example focusing on the NBA All Star game, and much more.
