A provocative and timely call for a moral approach to economics, drawing on philosophers, political theorists, writers, and economists from Aristotle to Marx to Keynes. What constitutes the good life? What is the true value of money? Why do we work such long hours merely to acquire greater wealth? These are some of the questions that many asked themselves when the financial system crashed in 2008. This book tackles such questions head-on. The authors begin with the great economist John Maynard Keynes. In 1930 Keynes predicted that, within a century, per capita income would steadily rise, people 's basic needs would be met, and no one would have to work more than fifteen hours a week. Clearly, he was wrong: though income has increased as he envisioned, our wants have seemingly gone unsatisfied, and we continue to work long hours. The Skidelskys explain why Keynes was mistaken. Then, arguing from the premise that economics is a moral science, they trace the concept of the good life from Aristotle to the present and show how our lives over the last half century have strayed from that ideal. Finally, they issue a call to think anew about what really matters in our lives and how to attain it. *How Much Is Enough?* is that rarity, a work of deep intelligence and ethical commitment accessible to all readers. It will be lauded, debated, cited, and criticized. It will not be ignored.

In 1930 the great economist Keynes predicted that, over the next century, income would rise steadily, people's basic needs would be met and no one would have to work more than fifteen hours a week. Why was he wrong? Robert and Edward Skidelsky argue that wealth is not - or should not be - an end in itself, but a means to 'the good life'. Tracing the concept from Aristotle to the present, they show how far modern life has strayed from that ideal. They reject the idea that there is any single measure of human progress, whether GDP or 'happiness', and instead describe the seven elements which, they argue, make up the good life, and the policies that could realize them. ROBERT SKIDELSKY is Emeritus Professor of Political Economy at the University of Warwick. His biography of Keynes received numerous prizes, including the Lionel Gelber Prize and the Council on Foreign Relations Prize for International Relations. He was made a life peer in 1991, and a Fellow of the British Academy in 1994. EDWARD SKIDELSKY is a lecturer in the Philosophy Department of the University of Exeter. He contributes regularly to the *New Statesman*, *Spectator* and *Prospect*. His previous books include *The Conditions of Goodness* and *Ernst Cassirer: The Last Philosopher of Culture*.

Doing well with money isn ’ t necessarily about what you know. It ’ s about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don ’ t make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In The Psychology of Money, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life ’ s most important topics.
