Refraction by spherical lens

Lecture 02 (LIGHT Class 10)

Lesson 5 Refraction And
Lenses

Lenses serve to refract light at each boundary. As a ray of light enters a lens,

Read Book Lesson 5

Refraction And Lenses

it is refracted; and as the same ray of light exits the lens, it is refracted again. The net effect of the refraction of light at these two boundaries is that the light ray has changed directions.
