MAKING HARD DECISIONS WITH DECISIONTOOLS is a new edition of Bob Clemen's best-selling title, MAKING HARD DECISIONS. This straightforward book teaches the fundamental ideas of decision analysis, without an overly technical explanation of the mathematics used in decision analysis. This new version incorporates and implements the powerful DecisionTools software by Palisade Corporation, the world's leading toolkit for risk and decision analysis. At the end of each chapter, topics are illustrated with step-by-step instructions for DecisionTools. This new version makes the text more useful and relevant to students in business and engineering. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Chapter 13: The Excellence of Love is based on 1 Corinthians 13, the quintessential text on love. First Corinthians 13 is often recited at weddings, painted on wall-hangings, and memorized by people. First Corinthians 13 paints word pictures that unearth the meaning, motives, and maturing of love—Christ-like love. Love that is deeper and broader than the love sung about in sentimental songs. This love is real. It changes the world. Chapter 13: The Excellence of Love presents a better way to live; a better way to treat people. And, that way is to love. Love matters most. It is the most excellent way to live. Chapter 13: The Excellence of Love needs to be read, understood, and obeyed. Then, our life will be enriched, like God intended, enriched with his love as we love others.

During our lifetime, we have some quite difficult choices that challenge our decision-making process. Sometimes we may regret the decision or not even know if we made the right one. And occasionally we put off the decision until we absolutely have to make it or, as it happens, we wait for our circumstances to make the decision for us. Using his years of professional and personal experience, and education in engineering and science, Gerard Ibarra developed an easy-to-use framework that is measurable, repeatable, and reliable. He uses the framework "to make more efficient and effective decisions" for his clients and himself. Now, he wants to share this simple five-step process with you so that, you

too, can make the best decisions for yourself.

Drawing from different 'fields' such as philosophy, psychology, literature, and theology, Joseph Bikart uses decades of experience as a business coach for senior executives around the globe to explore how and why we make the decisions we do. What is it that makes some of us better - or worse - than others at committing to a choice? What are the forces that hold us back, and how can we successfully overcome them? Every facet of our lives depends on the decisions we make. Yet, how often do we pause to reflect on our ability to make the best and smartest choices? The key is how we confront and refine the decision making process. Joseph Bikart explores the intricacies of decision making, challenging us to understand why we make the choices we do. He explores how the true power of decisions, especially the toughest among them, help us to face our fears and may in turn change how we think about ourselves. The book is broken into four clear parts and punctuated with short practical essays Bikart presents a lively and compelling exploration of the process of decision making covering; Indecision, indecision - what makes us indecisive? What holds us back and why? Where Art Thou? How and where we get stuck and the importance of relaxing one's grip. The Momentum of Decisiveness - Keeping our focus and proactivity. The Deciding Mind - making our smartest choices. Drawing from such different fields as philosophy, psychology, neurology, literature, art history and theology, we are taken on a journey from the depths of procrastination to the elation of decision making. Presenting a fresh perspective on what to do at the proverbial fork in the road, Bikart's unique philosophy is insightful, thought provoking, and potentially life-changing.

Decision Making near the End of Life provides a comprehensive overview of the recent developments that have impacted decision-making processes within the field of end-of-life care. The most current developments in all aspects of major underlying issues such as public attitudes, the impact of media, bioethics, and legal precedent provide the background information for the text. The authors examine various aspects of end-of-life choices and decision-making, including communication (between and among family, medical personnel, the dying person), advance directives, and the emergence of hospice and palliative care institutions. The book also explores a variety of psychosocial considerations that arise in decision-making, including religion/spirituality, family caregiving, disenfranchised and diverse groups, and the psychological and psychiatric problems that can impact both the dying person and loved ones. Case studies and first-person stories about decision-making, written by professionals in the field, bring a uniquely personal touch to this valuable text.

This book is a core text for students of consumer or buyer behaviour. It looks at the subject from a psychological perspective and psychological themes that cross different areas are highlighted, such as personality and lifestyle effects.

Provides a coherent and comprehensive account of the theory and practice of real-time human disease outbreak detection, explicitly recognizing the revolution in practices of infection control and public health surveillance. Reviews the current mathematical, statistical, and computer science systems for early detection of disease outbreaks Provides extensive coverage of existing surveillance data Discusses experimental methods for data measurement and evaluation Addresses engineering and practical implementation of effective early detection systems Includes real case studies

"This book is about the creative and messy process of making environmental management decisions. The approach we describe is called Structured Decision Making, a distinctly pragmatic label given to ways for helping individuals and groups think through tough multidimensional choices characterized by uncertain science, diverse stakeholders, and difficult tradeoffs. This is the everyday reality of environmental management, yet many important decisions currently are made on an ad hoc basis that lacks a solid value-based foundation, ignores key information, and results in selection of an inferior alternative. Making progress--in a way that is rigorous, inclusive, defensible, and transparent--requires combining analytical methods drawn from the decision sciences and applied ecology with deliberative insights from cognitive psychology, facilitation, and negotiation. We review key methods and discuss case-study examples based in our experiences in communities, boardrooms, and stakeholder meetings. Our goal is to lay out a compelling guide that will change how you think about making environmental decisions"--

Discusses the way leaders deal with risk in making foreign policy decisions

Business industries depend on advanced models and tools that provide an optimal and objective decision-making process, ultimately guaranteeing improved competitiveness, reducing risk, and eliminating uncertainty. Thanks in part to the digital era of the modern world, reducing these conditions has become much more manageable. Advanced Models and Tools for Effective Decision Making Under Uncertainty and Risk Contexts provides research exploring the theoretical and practical aspects of effective decision making based not only on mathematical techniques, but also on those technological tools that are available nowadays in the Fourth Industrial Revolution. Featuring coverage on a broad range of topics such as industrial informatics, knowledge management, and production planning, this book is ideally designed for decision makers, researchers, engineers, academicians, and students.
