MTU Engines. MTU Friedrichshafen is a core brand of Rolls-Royce Power Systems AG, a global-leading manufacturer of high- and medium-speed diesel engines together with complete drive systems, distributed energy systems and fuel injection systems for the most demanding requirements. MTU Size. At Diesel Generator Direct we currently stock a range of high power generator solutions from MTU ranging from 802 kVA (prime) up to 2370 kVA (prime), all the sets are open but can be containerised on request.

Utilizing natural gas, biogas or other gases, MTU generator sets feature cutting-edge technology that provide combined heat and power (CHP), as well as combined heat, power and cooling (CHPC) solutions. All of our gas gensets combine the highest performance with the lowest emissions in the 128 kW - 2,535 kW electrical power range.

Gas Generator Sets - MTU Solutions
Engineered with compact dimensions, MTU power generation engines are easily integrated into generators. Covering a performance spectrum of between 249 to 3,490 kW, they are ideal for use in emergency, base load and peak load gensets (prime/standby power: 50/60 Hz).
