This portable handbook has nearly 300 entries that cover documentation required for common diseases, major emergencies, complex procedures, and difficult situations involving patients, families, other health care team members, and supervisors. In addition to patient care, this book also covers documents

Thoroughly updated for its Second Edition, this comprehensive reference provides clear, practical guidelines on documenting patient care in all nursing practice settings, the leading clinical specialties, and current documentation systems. This edition features greatly expanded coverage of computerized charting and electronic medical records (EMRs), complete guidelines for documenting JCAHO safety goals, and new information on charting pain management. Hundreds of filled-in sample forms show specific content and wording. Icons highlight tips and timesavers, critical case law and legal safeguards, and advice for special situations. Appendices include NANDA taxonomy, JCAHO documentation standards, and documenting outcomes and interventions for key nursing diagnoses.

Focuses on the communication skills that are the key to good documentation.

Nurses are now commonly cited or implicated in medical malpractice cases.

Provides information on documentation issues, including electronic medical records, legal and ethical implications, and documentation in acute cases, along with a variety of charting examples.

Designed for rapid on-the-job reference, Documentation in Action offers comprehensive, authoritative, practice-oriented, up-to-the-minute guidelines for documenting every situation in every nursing practice setting and important nursing specialties. Need-to-know information is presented in bulleted lists, charts, flow sheets, sidebars, and boxes, with icons and illustrative filled-in samples. Coverage includes documentation for care of patients with various diseases, complications, emergencies, complex procedures, and difficulties involving patients, families, and other health care professionals. Suggestions are given for avoiding legal pitfalls involving telephone orders, medication reactions, patients who refuse care, and much more. A section addresses computerized documentation, HIPAA confidentiality rules, use of PDAs, nursing informatics, and electronic innovations that will soon be universal.

A time-efficient and cost-effective method of documentation of nursing care through a system of charting by exception (the documentation of abnormal or significant findings using a standard normal base) is described in this book. The method eliminates time-consuming documentation of normal findings and repetitious information, allowing the nurse to spend less time at the desk and more time caring for patients.
