park assist sensors | eBay
In a Park Assist L4 lightpipe-sensor system, the dual cameras in each smart-sensor are installed above the driving lane with an unobstructed view of the parked vehicles and the spaces around them. This is a key element in the success of the surveillance add-on software module: which augments our M4 PGS with a level of expanded security/safety that would otherwise be cost-prohibitive.

L4 Lightpipe Sensors - Park Assist
The parking sensor has been widely used for some time now and, as a result, is the most common parking device on the market. Sensors mounted on the bumpers detect the distance of obstacles from the extremities of the car, and deliver an audible beep which gradually becomes more panicked the closer you get.
