The Children Act 2004 is an Act of the Parliament of the United Kingdom. The Act amended the Children Act 1989, largely in consequence of the Victoria Climbié inquiry. The Act is now the basis for most official administration considered helpful to children, notably bringing all local government functions of children's welfare and education under the statutory authority of local Directors of Children's Services. The Act also created the ContactPoint database; this, however, has since been axed.

NOW A MAJOR MOTION PICTURE A brilliant, emotionally wrenching novel from the author of Atonement and Amsterdam. Fiona Maye is a High Court judge in London presiding over cases in family court. She is fiercely intelligent, well respected, and deeply immersed in the nuances of her particular field of law. Often the outcome of a case seems simple from the outside, the course of action to ensure a child's

welfare obvious. But the law requires more rigor than mere pragmatism, and Fiona is expert in considering the sensitivities of culture and religion when handing down her verdicts. But Fiona's professional success belies domestic strife. Her husband, Jack, asks her to consider an open marriage and, after an argument, moves out of their house. His departure leaves her adrift, wondering whether it was not love she had lost so much as a modern form of respectability; whether it was not contempt and ostracism she really fears. She decides to throw herself into her work, especially a complex case involving a seventeen-year-old boy whose parents will not permit a lifesaving blood transfusion because it conflicts with their beliefs as Jehovah's Witnesses. But Jack doesn't leave her thoughts, and the pressure to resolve the case--as well as her crumbling marriage--tests Fiona in ways that will keep readers thoroughly enthralled until the last stunning page.

This updated edition reflects the changes in legislation and practice which have taken place since the book was first published in 1994. The Children's Act 1989 is important not just because it is such a comprehensive piece of legislation, but because it is also the end product of a substantial amount of debate about law and practice, and philosophy and principle.

Literary ombudsman John Crace never met an important book he didn't like to deconstruct. From Salman Rushdie to John Grisham, Crace retells the big books in just 500 biting satirical words, pointing his pen at the clunky plots, stylistic tics and pretensions to Big Ideas, as he turns publishers' golden dream books into dross. In the grand tradition of Tom Lehrer and Stan Freberg, Crace takes the books that produce the most media hype and retells each story in its author's inimitable style. Philip Roth, Don DeLillo, Margaret Drabble, Paul Auster, Alice Sebold, John Updike, Tom Wolfe, Ruth Rendell, A.S. Byatt, John LeCarre, Michael Crichton and Ian McEwan all emerge delightfully scathed in this book that makes it easy to talk knowingly about books you've never bothered to read or, for that matter, should have.

The setting is Berlin. Into this divided city, wrenched between East and West, between past and present; comes twenty-five-year-old Leonard Marnham, assigned to a British-American surveillance team. Though only a pawn in an international plot that is never fully revealed to him, Leonard uses his secret work to escape the bonds of his ordinary life -- and to lose his unwanted innocence. The promise of his new life begins to be fulfilled as Leonard becomes a crucial part of the surveillance team, while simultaneously being initiated into a new world of love and sex by Maria, a beautiful young German woman. It is a promise that turns to horror in the course of one terrible evening -- a night when Leonard Marnham learns just how much of his innocence he's willing to shed.

The high profile cases of Charlie Gard, Alfie Evans, and Tafida Raqeeb raised the questions as to why the state intrudes into the exercise of parental responsibility concerning the medical treatment of children and why parents may not be permitted to decide what is in the best interests of their child. This book answers these questions. It argues for a reframing of the law concerned with the medical treatment of children to one which better protects the welfare of the individual child, within the context of family relationships recognising the duties which professionals have to care for the child and that the welfare of children is a matter of public interest, protected through the intervention of the state. This book undertakes a rigorous critical analysis of the case law concerned with the provision of medical treatment to children since the first reported cases over forty years ago. It argues that understanding of the cases only as disputes over the best interests of the child, and judicial resolution thereof, fails to recognise professional duties and public responsibilities for the welfare and protection of children that exist alongside parental responsibilities and which justify public, or state, intervention into family life and parental decision-making. Whilst the principles and approach of the court established in the early cases endure, the nature and balance of these responsibilities to children in their care need to be understood in the changing social, legal, and political context in which they are exercised and enforced by the court. The book will be a valuable resource for academics, students, and practitioners of Medical Law, Healthcare Law, Family Law, Social Work, Medicine, Nursing, and Bioethics.

Launching Palgrave's new Interagency Working in Health and Social Care series, this book provides one of the first reflective assessments of the Every Child Matters legacy of New Labour. Woven through with the voice of the child, it examines the new landscape of children's services, in both principle and practice.

This book identifies the definition of a child within the law, the rights of children, and discusses the extent to which primarily English law gives adequate recognition to and protection of these rights. To what extent does English law give adequate recognition to and protection of the rights of children? Historically the idea of and protection of rights has focused on parental rights rather than the rights of the child. The rights of children have remained far less recognised and certain until recently. Using case studies from the United Kingdom and beyond, this book takes a thematic approach to children's rights and considers topics including: underlying concepts such as the welfare of the child and safeguarding, the right to education and to medical treatment, the right to freedom from abuse and/or sexual and commercial exploitation, including contemporary challenges from forced marriage, FGM, modern slavery and trafficking, the role of the State in relation to children in need of care and protection, children's rights in the criminal justice system, the right to contract and employment. In addition, the book provides an introduction to key aspects of domestic and international law, including the Children Act 1989, the UN Convention on the Rights of the Child, the European Convention on Human Rights and the Human Rights Act 1998. The book will be of great interest to law and social science students in the areas of Child Development and Protection, Human Rights Law, Family Law, Child Law, and Child Studies,
