In The Victorian Internet, Tom Standage examines the history of the telegraph, beginning with a horrifically funny story of a mile-long line of monks holding a wire and getting simultaneous shocks in the interest of investigating electricity and ending with the advent of the telephone. All the early "online" pioneers are here: Samuel Morse, Thomas Edison and a seemingly endless parade of code-makers, entrepreneurs and spies who helped ensure the success of this communications revolution.

Tom Standage's The Victorian Internet, a historical survey of the telegraph from its origins in the optical telegraph of Revolutionary France to the beginning of its eclipse by the telephone in the 1880s, makes a superficially convincing argument that the telegraph fostered a tight-knit culture among mid-19th century telegraphists comparable to contemporary Internet culture.

The Victorian Internet
The Victorian Internet tells the colorful story of the telegraph's creation and remarkable impact, and of the visionaries, oddballs, and eccentrics who pioneered it, from the eighteenth-century French scientist Jean-Antoine Nollet to Samuel F. B. Morse and Thomas Edison. The electric telegraph nullified distance and shrank the world quicker and further than ever before or since, and its story mirrors and predicts that of the Internet in numerous ways.
