Written by over 200 leading experts from over seventy countries, this handbook provides a comprehensive, state-of-the-art overview of the latest theory and research on volunteering, civic participation and nonprofit membership associations. The first handbook on the subject to be truly multinational and interdisciplinary in its authorship, it represents a major milestone for the discipline. Each chapter follows a rigorous theoretical structure examining definitions, historical background, key analytical issues, usable knowledge, and future trends and required research. The nine parts of the handbook cover the historical and conceptual background of the discipline; special types of volunteering; the major activity areas of volunteering and associations; influences on volunteering and association participation; the internal structures of associations; the internal processes of associations; the external environments of associations; the scope and impacts of volunteering and associations; and conclusions and future prospects. This handbook provides an essential reference work for third-sector research and practice, including a valuable glossary of terms defining over eighty key concepts. Sponsored by the International Council of Voluntarism, Civil Society, and Social Economy Researcher Associations (ICSERA; www.icsera.org), it will appeal to scholars, policymakers and practitioners, and helps to define the emergent academic discipline of voluntaristics.

Dimensions of Human Behavior: The Changing Life Course presents a current and comprehensive examination of human behavior across time using a multidimensional framework. Author Elizabeth D. Hutchison explores both the predictable and unpredictable changes that can affect human behavior through all the major developmental stages of the life course, from conception to very late adulthood. Aligned with the 2015 curriculum guidelines set forth by the Council on Social Work Education (CSWE), the Sixth Edition has been substantially updated with contemporary

issues related to gender and sexuality, race and ethnicity, and social class and disability across the lifespan.

The Oxford Handbook of Prosocial Behavior provides a comprehensive review of the current literature on when and why people act to benefit others. It provides a comprehensive overview of the field to give both the casual reader and the neophyte to the field some perspective about fundamental questions (what, why, when, and who) relative to prosocial behavior. Taking a multi-level approach, the chapters represent the broad spectrum of this multi-faceted domain. Topics range from micro-level analyses involving evolutionary and comparative psychological factors to macro-level applications, such as reducing intergroup conflicts and ethnic genocide. Between these extremes, the contributors--all internationally recognized in their field--offer their perspectives on developmental processes that may predispose individuals to empathize with and respond to the needs of others, individual differences that seem to interact with situational demands to promote helping, and the underlying motivations of those helping others. They explain volunteerism, intragroup cooperation, and intergroup cooperation to move the analysis from the individual to group-level phenomena. They extend the consideration of this topic to include support of pro- environmental actions, means to encourage participation in medical clinical trials, and the promotion of world peace. The ways that gender, interpersonal relationships, race, and religion might affect decisions to give aid and support to others are also addressed. The final chapter offers a unique view of prosocial behavior that encourages researchers and readers to take an even broader consideration of the field to search for a prosocial consilience.

broad range of survey information to offer a detailed portrait of the volunteer in America, *Volunteers* provides an important resource for everyone who works with volunteers or is interested in their role in contemporary society. Mark A. Musick and John Wilson address issues of volunteer motivation by focusing on individuals' subjective states, their available resources, and the influence of gender and race. In a section on social context, they reveal how volunteer work is influenced by family relationships and obligations through the impact of schools, churches, and communities. They consider cross-national differences in volunteering and historical trends, and close with consideration of the research on the organization of volunteer work and the consequences of volunteering for the volunteer.

This special issue highlights how social psychology can further the understanding of important social, health, interpersonal, and intergenerational issues facing people as they age. This issue has three goals: to generate more interest in aging as an area of study for social psychologists by showcasing researchers who are currently integrating basic social psychological research with issues in aging and lifespan development; to challenge readers to think about how their research programs can interconnect with issues in aging; and to demonstrate how social psychological processes have direct application to many of the issues facing people as they age.

"This encyclopedia is a welcome exploration of the great variety of social networks that human beings create and participate in. Interdisciplinary in scope, the set includes contributions from some of the foremost scholars studying community today. Appendixes include an extensive bibliography, a collection of resources guides, an annotated guide to "Community in Popular Culture," and "Libraries Build Community," a guide for librarians."--"The Top 20 Reference Titles of the Year," *American Libraries*, May 2004.
